Re: Fragrant 40

NPDES No. ILA010101

Notice of Incompleteness

NPDES PROGRAMS BRANCH
EPA, REGION 5

Gentlemen:

The permit application and supporting documents for the NPDES Permit, received on February 26, 2013, for the above referenced project has been reviewed and deemed an inadequate submission for the purpose of review towards issuance of an NPDES permit. The following specific information and documentation are required to be submitted within the designated time frame below in order that we may continue our review.

An Agency review was done on the nutrient management plan based on the land available that is owned and/or managed by the applicant. The review determined the applicant does not have adequate land to properly land apply the manure. The nutrient management plan must demonstrate that the applicant has enough available land under its operation and management control to appropriately land apply the manure.

Please provide a written response to the above items within 30 days of the date of this letter. Failure to submit a response that includes the requested information within the time period specified may cause the Permit Section to refer the facility to the compliance and enforcement programs, and could be cause for denial of your NPDES Permit. Include on all correspondence the above proposed NPDES permit number.

Upon receiving a written response including the requested information the Agency will continue review of the application. Should you have any questions or comments regarding the above, please contact me at 217/781-0610 or at the above address.

Regards,

James M. Cowles

Environmental Protection Engineer
